## Summary

Driven by a passion for solving complex challenges through creativity and leading-edge technology, I am a technology professional specializing in business applications. My commitment to continuous learning ensures I deliver high-caliber results on every project. By deeply understanding both technical intricacies and overarching business goals, I develop solutions that effectively resolve problems while simultaneously creating strategic value and a competitive edge

## Experience

### Mutant

Jul de 2024 - presente

Brazil - Remoto

🔗 <https://mutant.com.br>

**Solution Architect** with experience in requirements analysis, solution design, technology evaluation and project leadership

#### Responsibilities:

- Collaborate with other architecture teams.
- Refine solutions and assign tasks to the development team.

- Participate in Scrum rituals.

- Present Solution Reviews.

- Ensure the quality and health of development modules.

- Conduct Knowledge transfer.

- Monitor post-implementation indicators (build-run model).

- Implement continuous improvements in CI/CD (DevOps).

#### Requirements:

- Experience with Docker, Kubernetes, SRE, SOLID principles, Clean Architecture, Clean Code, security and open-source technologies.

- Proficiency in Java, Javascript, Python, React, Vue.js, Node.js, HTML5, CSS, Sass, Material UI and Design Systems.

- Knowledge of messaging, diagramming, mutation testing, code smells, C4 Model, CQRS and SOAP.

- Strong organisational skills and a sense of priority

### L.J-tech

Jan de 2024 - Jul de 2024

Rio de Janeiro, Brasil · Remoto

• Back-end with Java/Kotlin: Development of a secure back-end for managing bookings, rates, and room availability, using Kotlin to leverage interoperability with Java and modernize the system.

• Mobile with Android & React Native: Creation of native apps for Android and a cross-platform version with React Native, enabling users to make bookings, check status, and modify their stays directly from their smartphones.

• JavaScript, TypeScript & Vue.js for Front-end: Development of a booking web portal with an attractive and functional user interface, employing Vue.js and TypeScript for better performance and user experience.

• Node.js & RabbitMQ for Real-Time Processing: Implementation of Node.js to handle real-time communications about changes in bookings and availability, with RabbitMQ facilitating the reliable delivery of messages between system components.

• Swagger for API Documentation: Documentation of all system APIs with Swagger, providing a valuable resource for developers working on integrating third-party services, such as price comparison websites.

### To-brasil

mai de 2021 - abr de 2023

Brazil - Remoto

🔗 <https://www.to-brasil.com/>

Fullstack Mobile and Web

Client: Rio Card

Products: Card

Skills: VueJS · Vue Router · VueX · Composition API · Node.js · Jest · Rest · Axios · TypeScript · AWS · Adobe XD · Vuetifyjs · MongoDB · [Bulma.io](#)

Client: Descomplica

Products: · App Vestibulares · App de Faculdade · Social Media Desco.

Skills: VueJS · Vue Router · VueX · Composition API · ReacJS · React Native · Node.js · Jest · GraphQL · Context API · TypeScript · Zustand · Redux ·

Android Studio · Xcode · OneSignal · CodePush · Notifee · AWS · Tailwind CSS · Material-UI · NextJS · Reactotron · ReactDebugger · Figma · Zeplin ·

Axios · Sentry · Express · PostgreSQL · AsyncStorage · Docker · Docker-Compose · Sequelize · MixPanel.

### Redspark

ago de 2023 - jan de 2024

Brasil - remoto

🔗 <https://www.redspark.io/>

• Developed and optimized front-end features for applications serving over 3 million users using React Native and ReactJS.

• Engineered scalable solutions, enhanced performance, and reinforced application security.

• Collaborated in API integration, performed thorough testing, and maintained comprehensive documentation.

• Adhered to best practices in development, focusing on security standards and privacy regulations within an agile environment.

## Education

### University Estacio de Sá

2017-2020

Systems Analysis and Development - Creation of corporate Bachelor's degree systems

9.63

🔗 <https://estacio.br/>

- The course prepares professionals to create, analyze, design and implement computer information systems. It is formatted with disciplines to develop logical reasoning, mastery of programming languages and project construction methodologies, among others.

### Universidade Castelo Branco - UCB

2012 - 2013

Master of Business Administration (M.B.A.)

Project Management

9

🔗 <https://castelobranco.br/>

- Activities and Groups: Project developments with the vision of P.M.I Atividades e grupos: Project developments with the vision of P.M.I
