LEONARDO JAQUES

Solution Architect | Tech Lead | Software Engineer

Rio de Janeiro, RJ jaques.projetos@outlook.com +55 21 97285-6520 jaquesprojetos.com.br

linkedin.com/in/leonardojaques-dev github.com/leonardojaques

PROFESSIONAL SUMMARY

Solution Architect and Tech Lead with solid experience in software architecture design, legacy system modernization, and technical leadership. Currently focused on high-performance solutions using Java, Cloud Computing, and Big Data (Databricks). Possesses a diverse background in Full Stack (Java/Kotlin, React, Node.js) and mobile development. Enthusiast of open-source technologies and software engineering best practices.

PROFESSIONAL EXPERIENCE

Mutant | Remoto - Sao Paulo / Vivo

Jul 2024 – Present

Solution Architect / Tech Lead

- **Architecture & Design:** Requirements analysis, solution design (C4 Model, CQRS, SOAP, Messaging/Kafka), technology evaluation, and presentation of Solution Reviews in collaboration with multiple teams.
- **Leadership & Quality:** Conducting agile ceremonies (Scrum), backlog refinement, and task delegation. Ensuring module health through Clean Architecture, Clean Code, SOLID principles, and mutation testing.
- **Operations & SRE:** Post-deployment indicator monitoring (build-run model) using Kibana and SRE, implementing continuous improvements in CI/CD pipelines and Kubernetes clusters.
- **HAC-Analytics Project:** Architecture and implementation of an Analytics solution using Databricks and PowerBI for large-scale data processing.
- **identify-ip Project:** Led the replacement of a legacy system, focusing on performance optimization and scalability.
- **SIP Migration:** Architectural leadership in the migration of corporate clients from the SIP family (voice services), restructuring VoIP traffic and signaling solutions.
- **Ind.Executivos:** Development of a corporate solution aimed at optimizing business workflows and usability.
- **KYC - Fill In:** Architecture and API design to optimize automated customer data fulfillment, ensuring resilience in integrations with external data providers.
- **KYC - Match:** API refactoring and optimization of the identity matching engine, supporting high concurrency for real-time validation.
- **KYC - Age Verification:** Optimization of age verification APIs focusing on low latency and security, integrating legacy systems and third-party databases.
- **KYC - Customer Insights:** Restructuring of analytical APIs with advanced caching strategies, drastically reducing query response times.

L.J-tech (Consultoria) | Remoto

Jan 2024 – Jul 2024

Full Stack Developer

Full Stack Developer

- **Back-end (Java/Kotlin):** Developed a secure system for managing reservations, rates, and room availability.
- **Mobile (Android & React Native):** Created native and cross-platform apps allowing users to manage stays directly via smartphone.
- **Front-end (Vue.js, JS/TS):** Developed a high-performance, interactive web portal for the booking flow.
- **Messaging (Node.js & RabbitMQ):** Implemented real-time processing for reliable communication and availability synchronization.
- **APIs (Swagger):** Comprehensive documentation of endpoints to enable seamless third-party service integrations (e.g., price comparison sites).

Redspark | Remoto — Aug 2023 – Jan 2024

Full Stack Developer

- **Front-end and Mobile (React Native/ReactJS):** Developed and optimized features for the Sesc-SP App, serving over 3 million users.
- **Scalability and Security:** Designed scalable solutions, focusing on performance improvement, high responsiveness, and reinforcing application security.
- **APIs and Testing (Swagger):** Collaborated on API integrations, conducted rigorous testing, and maintained detailed technical documentation.
- **Best Practices (Agile):** Followed best development practices in an agile environment, focusing on security standards and privacy regulations.

L.J-tech (Consultoria) | Remoto — Apr 2023 – Sep 2023

Full Stack Developer

- **Share Aero (ReactJS & Tailwind CSS):** Development of a robust platform for aeronautical data sharing, focusing on user engagement and comprehensive testing with **Jest** to ensure reliability.
- **NexMov (React Native & Node.js):** Led the creation of cross-platform mobile applications, focusing on responsiveness, innovation, and high client satisfaction.

TO Brasil | Remoto - Descomplica e Rio Card — May 2021 – Apr 2023

Full Stack Developer

- **Descomplica:** Creation of interfaces for educational social networks using React and NextJS. Mobile development with React Native and VueJS, including BFF (Backend for Frontend) architecture creation and monitoring adjustments in Sentry.
- **Rio Card:** Application development in VueJS, elaboration of solution designs, implementation of integrated tests, and maintenance/adjustments in systems using Java and Flutter.

PROJECTS AND PORTFOLIO

- **HidroGeo (Open Source):** Pluviometric monitoring tool in Rio de Janeiro using *Java 25* and Virtual Threads.
- **Credit Application System:** Complete system for credit management and application developed in *Kotlin*, focusing on architecture best practices.
- **DDD Project Fullstack:** Full Stack application implemented with *TypeScript*, demonstrating the practical application of Domain-Driven Design.
- **Lab Java Quarkus:** Study and implementation project of high-performance microservices using the *Quarkus* framework.
- **Test E2E Only Node.js:** Robust framework for automated End-to-End (E2E) testing using *Node.js*.

- **Mult-thread Streams:** Performance-focused project, exploring advanced concepts of parallel processing and data stream manipulation.

EDUCATION

Postgraduate Degree in Software Engineering – PUC Minas (Expected 2027)

MBA in Project Management – Universidade Castelo Branco

Bachelor's Degree in Marketing – Universidade Estacio de Sa

Systems Analysis and Development – Universidade Estacio de Sa

Associate's Degree in Web & Multimedia Design – Full Sail University

TECHNICAL SKILLS

Languages

Java (Current focus) | Kotlin | JavaScript/TypeScript | Python | SQL | HTML5 | CSS/Sass

Frameworks & Libs

Spring Boot | Quarkus | React | React Native | Vue.js | Node.js | Material UI

Cloud & DevOps

AWS | Azure (Portal, DevOps) | Docker | Kubernetes | Jenkins | SonarQube | CI/CD | SRE

Tools & Data

Databricks | PowerBI | Kibana | Sentry | MixPanel | OneSignal | LaunchDarkly | Hobknob | Convisio Platform

Architecture & Methodologies

Microservices | Clean Architecture | Hexagonal | Onion | Design Patterns | SOLID | Clean Code | CQRS | C4 Model | SOAP | Kafka/RabbitMQ | Scrum/Agile
